

The Respiratory System

Each day I'm breathing air in, I'm breathing air in. The air is sucked through nose and mouth.

Mucus it warms and moistens, it warms and moistens. The trachea the air goes down.

Yeah, the trachea divides in two

Both primary bronchus too

And you know it do, know it do

Yeah, branch off tertiary too

And then branching narrow tubes, bronchioles

Let's go respiratory system is made of your lungs

And passages that lead them oxygen to blood

It travels round your body organs, everyone

Breathe out gas carbon

And these are the lungs

Oh...Oh...

And these are the lungs

Oh...That's right it's the lungs

Respiratory system

Each bronchiole's a cluster, an air sac cluster

Capillaries they do engulf

Oxygen through alveoli to capillaries

Internal respiration's done

Get out carbon dioxide removed

Body breathing out for you, make it right

Let's go respiratory system is made of your lungs

And passages that lead them oxygen to blood

It travels round your body organs,

Oh...Oh...

And these are the lungs

Oh...That's right it's the lungs

Respiratory system

Ventilation, that is right, diaphragm flattens, it rises for life

The respiratory system x2

Let's go respiratory system is made of your lungs

And passages that lead them oxygen to blood

It travels round your body organs, everyone

Breathe out gas carbon

And these are the lungs

Respiratory system is made of your lungs

And passages that lead them oxygen to blood

It travels round your body organs, everyone

Breathe out gas carbon

And these are the lungs

Respiratory, respiratory, respiratory system (3)

That's right it's the lungs

Respiratory system
